S.No.	RFP Reference (Section No./ Page No.)	Points of Clarification required	Clarifications
1	3.1/5	The clause is generic, request you to provide following: 1. Bill of material with specifications. 2. Consumables will be provided by University or SI? 3. Why servers are required?	Required hardware and consumables will be provided by the university subject to receiving grant from the state Govt.
2	3.4/12	1. To host application in State Data Center, JPU need to get approval from SDC. 2. We are assuming the infrastructure will be provided by State Data center. Is our assumption is correct?	University will get approval from state Data Centre (SDC) for hosting application in SDC, You are requested to provide the details along with charges for hosting the application on secure private cloud (Data Centre)
3	3.4/12	While we can ensure that our application has the requisite API's for integration with other application, any integration will be possible only if the other applications provide also provide API's for integration. Can the university ensure it? Else can the university ensure that the other applications credentials, source code and design required for integration shared with us. Also provide the name and functionalities of the application along with integration point.	You are requested to migrate our legacy data in to the new UMIS system

4	3.6/13	How many users need to be trained, kindly give us number as this has cost and time impact. Also, this training will be conducted in centralized location or multiple, if multiple then kindly share number of locations.	Training of Users will be centralised Number of users to be trained will be 02 (two only) for each of the colleges and 05 (five only) at university headquarter. Approximate 70 personal will be provided training which may include one system Administrator (Admin)
5	3.8/15	For this clause we have 2 queries/suggestion: 1. Data entry operators and software support engineer is not required in colleges. They are required at centralized location. Hence request you to remove data entry operators and software support engineer from every 10 colleges. 2. When onsite support will start, will it start after priority 1 will go live or priority 6 go live?	Data entry operators and software support engineer are required at centralised location only, not for every 10 colleges as mentioned in RFP. Onsite support will start after priority 1 will go live.
6	General	What is the payment schedule?	Details of payment schedule will be mentioned in the work order.
